[moazamraffiquee@gmail.com](mailto:moazamraffiquee@gmail.com) | AGE:23 |

JUBAIL, Saudia Arabia

Transferable Iqama (2632152951)

### Summary:

Mechanical Engineer (QA/QC) based in Saudi Arabia specializing in site supervision, welding inspection, and quality management for piping and mechanical works, skilled in WPS/PQR/ITP review, welder qualification and JCC control, pre weld and visual inspections, preheat verification, NDT coordination (RT, UT, MT/PT, PMI, HT), calibration and traceability test-pack preparation, witnessing hydro/pneumatic tests for pipelines, and compiling status reports and handover dossiers.

### Education:

**University of Engineering & Technology, Peshawar Pakistan.**

BSc Mechanical Engineering

### Technical Skills

API 650, API 653, AMSE B31.3,  
ASME Section IX, AWS D1.1,  
AWWA D100, ISO 9001 2015,  
ASQ (CQA), ASQ(CQE) and AWS(CWI).  
Project management and Design execution.

### Softwares:

AutoCAD, SolidWorks, CREO, HAP, HVAC  
Microsoft Office 365, programming C++.

## Experience

### Mechanical Engineer

QC welding inspector at SINOMA CDI – Saudi Arabia

**July 2024 – Present**

- Conduct pre-job and pre-inspection meetings to ensure project quality and inspection readiness.
- Review WPS, ITPs, MTCs, and drawings for compliance with project specifications.
- Monitor welding activities and verify adherence to approved procedures and standards.
- Maintain calibration logs and ensure proper handling of welding equipment and consumables.
- Review NDT reports and ensure clearance before testing activities.
- Witness hydrostatic, pneumatic to confirm quality compliance.
- Perform visual inspections and report non-conformances during fabrication and construction.
- Supervise mechanical inspections for specification compliance.
- Prepare welding documentation including continuity reports, weld summaries, and daily reports.
- Coordinate QA/QC meetings and submit final inspection dossiers for project close-out.

### Mechanical Engineer

Attock oil refinery limited

**FEB 2023 – July 2024**

- Plan and execute shutdown work packs for columns, exchangers, pumps, compressors, turbines, boilers and tanks.
- Verify UT/PT/MT, hardness, alignment test and inspection.
- Conduct hydro/pneumatic tests and witness.
- Maintain materials traceability, torque/bolting control, calibrated instruments, and QA dossiers.
- Enforce PTW/LOTO rules, and pressure-test instructions.
- Drive CA, close NCRs, update standards/checklists.

## Certifications:

ISO: ISO 9001- Lead Auditor,

NDT LEVEL 2: UT, PT, DPT, MPT

OSHA: OSHA 48-Hour for General Industry Training

IOSH: IOSH Managing safely

CSC- Construction industry safety certificate.

Six sigma -green belt: Coursera Kennesaw State University

Welding Inspection

Construction safety: linked in

HVAC drawing and schematics: linked in

Fire Safety – introduction to fire safety (LinkedIn)

## PROJECTS (KSA):

- Eastern Province Cement Company (EPCC) Line 5, 10000TPD project Jubail KSA.
- Pipeline project - Duba neom Saudi Arabia.
- Mirage project- Neom Saudi Arabia WO-24.

## EDUCATION

---

### **B.Sc. Mechanical Engineering**

University of Engineering & technology,  
Peshawar.

---

#### **Field of study:**

##### **General Mechanical Engineering**

- Computer Systems & Programming
- Engineering Economics
- Materials Engineering
- Occupational Health and Safety
- Entrepreneurship

##### **Design and Materials**

- Engineering Mechanics
- Engineering Drawing and Graphics
- Computer Aided Drawing (CAD)
- Mechanics of Materials
- Engineering Metallurgy
- Design of Machine Elements

##### **Thermo-fluid**

- Thermodynamics
- Fluid Mechanics
- Heat and Mass Transfer
- Heating, Ventilating and Air Conditioning (HVAC)
- Power Plants

##### **Control Engineering**

- Mechanics of Machines
- Mechanical Vibrations
- Engineering Mechanics
- Mechatronics & Robotics
- Engineering Control
- Engineering Measurement and Instrumentation

##### **Manufacturing and Management**

- Workshop Practice
- Manufacturing Processes
- Production Automation
- Industrial and Project management

##### **Basic Sciences and other Engineering**

- Islamic Studies
- Functional English
- Communication & Presentation Skills
- Electrical and electronics
- Engineering Linear Algebra & Differential Equations
- Calculus and Analytical Geometry
- Numerical Analysis
- Probability and Statistics

## CERTIFICATIONS

---

### **OSHA – OSHA 48-Hour for General Industry Training**

- Developed comprehensive understanding of workplace safety regulations and hazard recognition to maintain safe industrial environments.
- Gained skills in implementing safety programs, accident prevention, and emergency response planning.

### **IOSH – IOSH Managing Safely**

- Learned practical techniques for managing health and safety risks in the workplace effectively.
- Enhanced ability to lead safety initiatives, conduct risk assessments, and ensure compliance with safety standards.

### **NEBOSH – International General Certificate (Pending)**

- In-depth knowledge of international health, safety, and environmental management principles.
- Equipped to identify workplace hazards, develop control measures, and promote sustainable safety cultures.

### **DigiSkills.Pk – Graphic Design**

- Developed foundational skills in visual communication, layout design, and branding principles.
- Gained experience with graphic design tools to create compelling digital content.

### **Coursera – Microsoft Office 365**

- Enhanced productivity skills through mastery of Word, Excel, PowerPoint, and Outlook for professional documentation and presentations.
- Learned collaborative tools and cloud-based workflows to improve team coordination.

### **Lean Six Sigma Green Belt - Kennesaw State University**

- Acquired fundamentals of Lean Six Sigma methodologies focused on process improvement, waste reduction, and quality management.

### **Risk Assessment**

- Learned to systematically identify, evaluate, and control workplace hazards to minimize risk and ensure safety.

### **Permit to Work**

- Gained knowledge of permit to work systems to manage high-risk activities safely and comply with regulatory requirements.

### **Introduction to Fire Safety Significance**

- Developed awareness of fire safety principles, prevention techniques, and emergency response protocols.
