- **Cut Along Dotted Lines:** Use scissors or a paper cutter to carefully trim the card following the dotted lines. Be precise to achieve a clean result.
- **Fold the Card:** Once you've cut it out, fold the card along the marked fold line. Ensure that all corners align perfectly for a neat and even fold.
- **Secure with Tape or Laminate:** To enhance the card's durability and lifespan, you have two options:

A) **Use Tape:** Apply transparent adhesive tape along the edges of the folded card. Make sure to press down firmly to ensure it sticks well. Trim any excess tape for a neat appearance.

B) **Laminate It:** If you have access to a laminating machine, you can laminate the card. Place the folded card between laminating sheets and run it through the laminator, following the machine's guidelines. This will provide a protective, waterproof layer for your card.
